

Week – 4 – September 14, 2013

NASA Aerosol (Particulate Matter) Products

Pawan Gupta
NASA ARSET- AQ On-line Short Course
Fall 2013

ARSET - AQ

Applied Remote SEnsing Training – Air Quality

A project of NASA Applied Sciences

Outline

- Remote sensing of aerosol - definitions
- Ground based remote sensing of aerosols – AERONET
- The NASA Satellite aerosol products.
- NASA aerosol remote sensing products as a surrogate for PM_{2.5}

Aerosol Optical Depth

- AOD - Aerosol Optical Depth
- AOT - Aerosol Optical Thickness

These optical measurements of light extinction are used to represent aerosol amount in the entire column of the atmosphere.

Aerosol Optical Depth vs PM 2.5

AOD or AOT represents the total column loading of aerosols in the atmosphere

PM2.5 is a measure of the mass of particles in a specific size range near surface

Moderate AOD ~0.40
Near Mt. Abu, India

Visibility and PM_{2.5}

Aerosol Optical Depth

AOD is a unit less quantity

Sample AOD values:

0.02 - very clean isolated areas

0.2 - fairly clean urban area

0.4 - somewhat polluted urban area

0.6 - fairly polluted area

1.5 - heavy biomass burning or dust event

Equivalent PM_{2.5} mass
concentration – Assuming
 $60 \mu\text{gm}^{-3}/\tau$

~ **$1 \mu\text{gm}^{-3}$**

~ **$12 \mu\text{gm}^{-3}$**

~ **$24 \mu\text{gm}^{-3}$**

~ **$36 \mu\text{gm}^{-3}$**

~ **$90 \mu\text{gm}^{-3}$**

Optical Depth

Sun

Atmosphere

I_0

I

Surface

The optical depth expresses the quantity of light removed from a beam by **scattering** or **absorption** during its path through a **medium**.

optical depth τ as

$$I = I_0 e^{-m\tau}$$

$$m = \sec \theta$$

$$\tau = \tau_{Rayl} + \tau_{aer} + \tau_{ga}$$

AERONET

Aerosol Robotic Network
<http://aeronet.gsfc.nas.gov>

AERONET is useful in providing
aerosol model information for
satellite retrievals

Measurement
PM_{2.5} mass**

- Point vs Area Averaged
- Surface vs Column
- Mass vs Optical

AOD to PM2.5 - Theoretical

AOD is correlated with ground-based PM_{2.5} mass. Assuming cloud-free skies, well-mixed boundary layer of height (*H*) with no overlying aerosols, and aerosols that have similar optical properties, the AOD can be written as¹⁵²:

$$AOD = PM_{2.5} H f(RH) \frac{3Q_{ext,dry}}{4\rho r_{eff}} = PM_{2.5} H S \quad (10)$$

where *f(RH)* is the ratio of ambient and dry extinction coefficients, ρ is the aerosol mass density ($g \cdot m^{-3}$), $Q_{ext,dry}$ is the Mie extinction efficiency, and r_{eff} is the particle effective radius (the ratio of the third to second moments of the size distribution). *S* is the specific extinction efficiency ($m^2 \cdot g^{-1}$) of the aerosol at ambient relative humidity (RH).

- AOD – Aerosol Optical Depth
- H – Height of well-mixed boundary layer
- f(RH) – ratio of ambient and dry extinction coefficients
- p – aerosol mass density
- Q – Mie extinction efficiency
- r – particle effective radius
- PM2.5 – PM2.5 mass concentration

AOD-PM Relationship

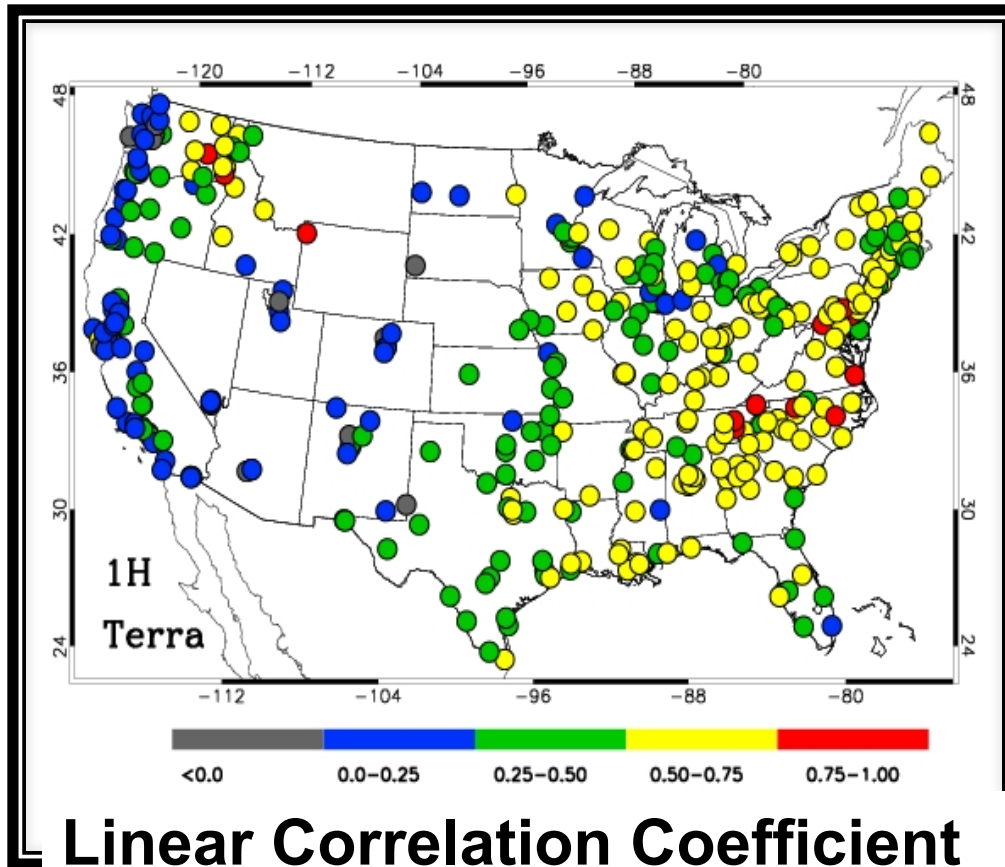

Figure 14. Relationship between 24-hour PM_{10} concentrations and daily averaged AERONET τ_a measurements from August to October 2000 in northern Italy.

MODIS AOD/PM2.5 Correlations

OMI

Ozone Monitoring Instrument (OMI)

One of four sensors on the EOS-Aura platform (OMI, MLS, TES, HIRDLS)

**An international project:
Holland, USA, Finland
Launched on 07-15-04**

Instrument Characteristics

- Nadir solar backscatter spectrometer
- Spectral range 270-500 nm (resolution~1nm)
- Spatial resolution: 13X24 km footprint
- Swath width: 2600 km (global daily coverage)

Retrieval Products

Column Amounts

- Ozone (O_3)
- Nitrogen Dioxide (NO_2)
- Sulfur Dioxide: (SO_2)
- Others

Aerosols

Applications of the Aerosol Index

- Validation tool for transport models
- Separation of carbonaceous from sulfate aerosols
- Identification of aerosols above PBL (i.e., PBL aerosols are not detectable by AI)
- Tracking of aerosol plumes above clouds and over ice/snow

Aerosols over clouds:
April 14, 2006

Transport around the globe of a high altitude smoke layer generated by the Australian fires in December 2006. Numbers indicate the day of the month.
